Notes

This name is no longer valid. Before the use of molecular tools, *R. solanacearum* was subdivided into races and biovars. Phylogenetic studies (2014) showed that the race/biovar subdivisions should no longer be used. See EPPO datasheet on *Ralstonia solanacearum* species complex for details. The data on distribution, host plants and categorization is kept as an archive to keep trace of reports made before this change.
